ANCHORING SYSTEMS

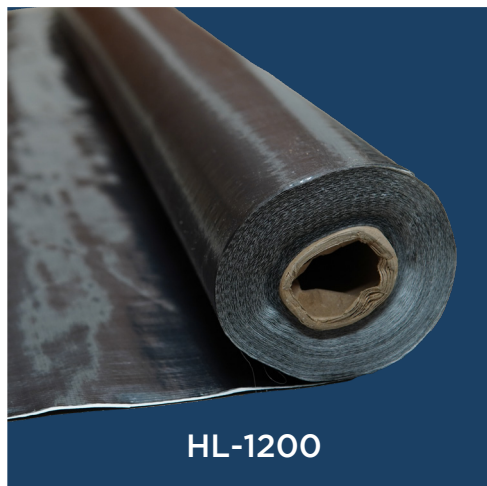

CRAWLSPACE ENCAPSULATION

Intech Anchoring Systems specializes in delivering top-notch moisture and vapor barrier solutions carefully crafted to efficiently seal crawlspaces, ensuring all-encompassing defense against moisture, pests, and rodents. Our resilient system is tailor-made to cater to the requirements of crawlspaces susceptible to water or moisture accumulation, which can result in potential decay and a range of associated problems.

Intech Anchoring Systems is committed to providing reliable solutions that address these concerns and deliver superior-quality products. We understand the potential damage that excessive moisture can cause in crawlspaces and aim to provide effective and long-lasting solutions.

THREATS TO YOUR HOME

- **Structural Damage:** The presence of rot beneath a home can compromise its structural integrity, leading to costly repairs or even collapse.
- **Health Risks:** Moisture in crawlspaces can create an ideal environment for the growth of mold spores and bacteria, which can pose health risks to occupants, including respiratory problems and allergies.
- **Insect Infestations:** Exposed crawlspaces are susceptible to insect infestations, such as termites, beetles, rodents, and snakes. These pests can cause significant damage to wood and other materials, increasing the vulnerability of the home.

REASONS TO USE ENCAPSULATION LINERS

One of the critical aspects of crawlspaces is controlling humidity levels to prevent mold growth. With humidity levels ranging from 50% to 90%, crawlspaces are susceptible to mold development, which can produce harmful toxins and negatively impact indoor air quality. Our crawlspace liners act as a preventive measure, inhibiting mold growth in and around the home while reducing the presence of allergens in the air.

Benefits

- Effectively control moisture infiltration
- Prevent the growth of mold
- Protection against invasive animals
- Contributes to the long term structural integrity
- Creates healthier living environment
- Increases the overall property value

PART NUMBER	DESCRIPTION
HL-1200	100% Reinforced 8 mil; Roll Size 4' x 100'
HL-1600	100% Reinforced 14 mil; Roll Size 12' x 100'
HL-20M12100	100% Reinforced 20 mil; Roll Size 12' x 100'
HL-1200FR	100% Reinforced 8 mil Fire Retardant; Roll Size 12' x 100'
HL-90FR	100% Reinforced 12 mil Fire Retardant; Roll Size 12' x 100'
60-0178	Ultra-VR Tape; Roll Size 4" x 180'
60-0109	Sealant Tape; Roll Size 4" x 50'
60-0151	Fire Retardant Tape; Roll Size 4" x 180'
