

**100% Reinforced 8 mil; Roll Size 12' x 100'
HL-1200**

DESIGNED USE:

The 100% reinforced 8 mil vapor barrier is designed for use in both vented crawlspaces, as a traditional vapor barrier, and in sealed crawlspaces for premium protection against ground moisture evaporation.

CONSTRUCTION:

The 100% reinforced 8 mil vapor barrier is constructed using only premium, 100% virgin polyethylene. The high density woven reinforcement provides the maximum level of protection against punctures and tears. The woven polyethylene is then coated on both sides to provide not only a bright white top finish, but also give ideal protection against moisture and soil gas permeability.

WEIGHT:

Class leading 37 pounds per 1,000 sqft
