## PORTABLE HELICAL INSTALLER KIT

Suitable to install up to 1-1/2-inch square shaft and 2-7/8-inch round shaft

This unit can be operated with as small as a two-man crew to install helical anchors in basements or other locations with overhead limitations. The reaction arm must be braced against a solid surface such as a basement wall or floor to provide resistance against the 6,000 ft-lbs of potential torque that this drive head can achieve.

### INSTALLATION KIT INCLUDES:

- 6K Drive Head
- Gas Powered Hydraulic Power Pack  
*minimum flow of 10gal/min  
pressure between 2,000 to 2,800 psi*
- Reaction Arm
- Drive Tool
- Foot Pedal
- Hoses
